DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-9, 11-18, 20-25, 27-30 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 7051367 to Krishnaswamy et al.(hereinafter Krishnaswamy).

Regarding Claim 1,9, Krishnaswamy discloses the identifying a packet associated with an processor see Col 5 Ln 7-11 & Fig. 3 item 42; identifying one or more platform-level network security protocols associated with extensible firmware interface see Fig. 3 item 52 & Fig. 4 item 68; identifying the packet with security conditions based on protocols see Col 5 Ln 44-52.

Regarding Claim 3, 11, Krishnaswamy discloses the identifying the packet incoming fro network interface see Col 4 Ln 64-66 and outgoing packet from operating system associated with the network interface see Fig. 2 item 18 & Col 2 Ln 61-64.

Regarding Claim 4, 12, 22, 29, Krishnaswamy does not disclose the configuration table having firewall, VPN and IP see Col 4 Ln 58-63 & Fig. 2 item 29.

Regarding Claim 5, 13, 23, 30, Krishnaswamy discloses the pointers being used in the PSR table to configure the routers see Col 5 Ln 7-11.

Regarding Claim 6, 14, Krishnaswamy discloses the associating the packet with one allowable condition see Fig. 4 item 76 and deny condition based on rate-limiting condition see Fig. 4 item 72.

Regarding Claim 7, 15, 20, 27, Krishnaswamy discloses the queues being used for packets see Fig. 5 item 82.

Regarding Claim 8, 16, 21, 28, Krishnaswamy discloses the deny condition resulting in sleeping(not accepting packets) of the processor see Fig. 5 item 90.

Regarding Claim 17, Krishnaswamy discloses the network interface(Fig. 1 item 60); interrupt handler to receive interrupt request(see Fig. 3 item 48); network driver(Fig. 2 item 22) to identify a packet associated with an processor see Col 5 Ln 7-11 & Fig. 3 item 42, identifying one or more platform-level network security protocols associated with extensible firmware interface see Fig. 3 item 52 & Fig. 4 item 68, and identifying the packet with security conditions based on protocols see Col 5 Ln 44-52.

Regarding Claim 18, 25, Krishnaswamy discloses the network interface card see Col 2 Ln 61-64.

Regarding Claim 24, Krishnaswamy discloses the network interface(Fig. 1 item 60; processor(Fig. 3 item 64) to identify a packet associated with an processor see Col 5 Ln 7-11 & Fig. 3 item 42, identifying one or more platform-level network security protocols associated with extensible

firmware interface see Fig. 3 item 52 & Fig. 4 item 68, and identifying the packet with security conditions based on protocols see Col 5 Ln 44-52.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 10, 19, 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 7051367 to Krishnaswamy et al.(hereinafter Krishnaswamy) in view of US Patent 5748980 to Lipe et al.(hereinafter Lipe).

Regarding Claim 2, 10, 19, 26, Krishnaswamy does not explicitly disclose the pre-boot environment and post boot environment. However, Lipe discloses the pre-boot environment with configuration data see Fig. 4B item 64 and post-boot environment identify the device drivers for buses see Fig. 4B item 70. It would be obvious to one having ordinary skill in the art at the time of the invention to include the pre-boot and post-boot environment in the invention of Krishnaswamy in order to have no conflict in resources as it occurs during boot-time as taught in Lipe see Fig. 4B item 60.
